

Global Land and Ocean Temperature Anomalies for all July's from 1880-2015

The graph shows average annual global temperatures since 1880 compared to long-term average (1901-2000). The zero line represents the long-term average temperature for the whole planet; blue and red bars show the difference above or below average for each year. The National Oceanic and Atmospheric Administration collected the temperature data from locations around the world.
